

# SUNSHINE Ordering System (Beginner Guide)

This guide is for first-time users.

Goal: follow the steps and complete tasks without technical knowledge.

---

## 1. Know the 3 Roles

- **Branch Staff:** place orders, check my orders, confirm receipt, view shortage updates
  - **Warehouse Staff:** process pending dispatch, enter dispatch quantities, handle shortages
  - **Administrator:** monitor overall status, export reports, publish stock arrival notices, manage email/images/messages
- 

## 2. Login and Basic Navigation

1. Open the system and choose language (EN/■■■).
  2. Select your role:
  3. Branch Staff: choose your branch and enter
  4. Warehouse/Admin: enter password to login
  5. Use the left sidebar to switch pages.
  6. Use top-right language toggle anytime.
- 

## 3. Branch Staff Workflow

### 3.1 Place an Order

Go to ■ Place Order:

1. Search by **product name / barcode / item code** (scanner supported).
2. Enter quantity on each product card (cartons / pcs).
3. Click ■ Add Selected to Cart.
4. Click ■ Review & Send Order, check items, then click ■ Send Order.
5. When you see "Order has been sent successfully", it is done.

Tips:

- Order page shows 5 products per page; use pagination to continue.
- If you see a "new stock arrival" notice, prioritize those items first.

## 3.2 Check Orders and Confirm Receipt

Go to ■ My Orders:

1. Find orders with status Dispatched.
2. Expand the order and review shipped quantities.
3. Enter actual received quantities and click ■ Confirm Receipt.

Result:

- Normal receipt changes status to Received.
- If actual < dispatched, shortage records are auto-created and warehouse is notified.

## 3.3 Check Shortage Progress

Go to ■ My Shortages:

- View warehouse handling status (Resending / Out of Stock / Resolved) and replies.

## 3.4 Check System Messages

Go to ■ Messages:

- View notifications for orders, dispatch, receipt, shortages, stock arrivals.
- Use Mark as read / Mark all as read.

---

## 4. Warehouse Staff Workflow

### 4.1 Pending Dispatch

Go to ■ Pending Dispatch:

1. Filter by branch, date, keyword if needed.
2. Expand an order; default dispatch qty equals ordered qty.
3. Adjust quantities based on real stock.
4. Click ■ Mark as Dispatched.

Result:

- Branch can confirm receipt in My Orders.
- System sends both email and in-app notification.

## 4.2 Handle Shortage Notifications

Go to ■ Shortage Notifications:

- For each shortage record, choose:
- ■■ Resend (set to Resending)
- ■ Mark Out of Stock
- Add warehouse reply; branch can see it in shortages/messages.

## 4.3 Dispatch History

Go to ■ Dispatch History:

- Review dispatched orders by date and receipt status.

---

## 5. Administrator Workflow

### 5.1 Dashboard

Go to ■ Dashboard to monitor:

- Orders today
- Pending dispatch
- Dispatched
- Open shortages
- Branch status and latest records

### 5.2 Stock Arrivals (Important)

Go to ■ Stock Arrivals:

1. Fill arrival title and notice.
2. Enter arrival item list (one per line).
3. You can search/select products and append to list (to avoid manual typing).
4. Click Publish arrival notice.

Effect:

- Branch sees the notice before placing orders.

- Same notice is pushed to branch message center.
- New notice replaces the previous active one.

## 5.3 Export Reports

Go to ■ Export Reports:

- Export picking list, reconciliation, shortage report (Excel).

## 5.4 Email Settings

Go to ■ Email:

- Configure SMTP, event recipients, branch emails.
- Send test email.
- Check email activity log.

---

## 6. Notification Rules

- In-app notifications cover new order, dispatched, received, shortage, stock arrival.
- Messages in sidebar shows unread count.
- Check messages first every shift to avoid missing tasks.

---

## 7. FAQ (Quick)

### Q1: Cannot find product in search?

- Confirm keyword (name/barcode/item code)
- Make sure you are on ■ Place Order
- Clear keyword and search again

### Q2: Branch cannot see dispatched order?

- Ask branch to refresh ■ My Orders
- Confirm warehouse actually clicked ■ Mark as Dispatched
- Admin can verify via email log and messages

### Q3: Why shortage appears?

- During receipt, actual qty is lower than dispatched qty
- System auto-creates shortage and notifies warehouse

---

## 8. Recommended Daily Routine

- **Branch:** check Messages first, then place orders
- **Warehouse:** process Pending Dispatch first, then Shortage Notifications
- **Admin:** publish Stock Arrivals immediately when new stock comes
